Subject: RE: WSA May 21 Project Review - Agenda and Presentation Template

Dear Piter:

Thank you for your note. I'll just anticipate that if I don't receive the presentations by the 17th, that the CRC presenters will have hard copies to project on the morning of the review.

Per your request, I've attached below the information from the project tracking database for your project N01327. Please let me know if you need anything else.

Thanks and kind regards,
Valerie

Dear Valerie,

We are currently preparing for an extended GLP-inspection that will go on from 13-17 May. Therefore, depending on what will happen, we may not be able to meet your deadline of May 17, but we will try.

Meanwhile, and to facilitate my project review, could you please send me my latest project review sheet No1327; MS Inhalation Use of Transgenic Mice: rasH2, p53- Variants ?

Thanks in advance,
Kind regards,
Piter

Subject: WSA May 21 Project Review - Agenda and Presentation Template

Dear project leaders:

Attached is the proposed agenda for the WSA May project review. If you require that someone present on your behalf, please let me know as soon as possible so that I can update the agenda. Videoconference room A-1 has been reserved for Richmond participants.

Also attached below is the updated presentation template. Please use this template in preparing your presentations. I would appreciate receiving copies of your presentations no later than May 17 in order to prepare copies for distribution.

Please let me know if you have questions or need any additional information in order to prepare for the review.

Thanks and regards,
Valerie
